DOUBLE CORE

THE BIRTH OF A REVOLUTION

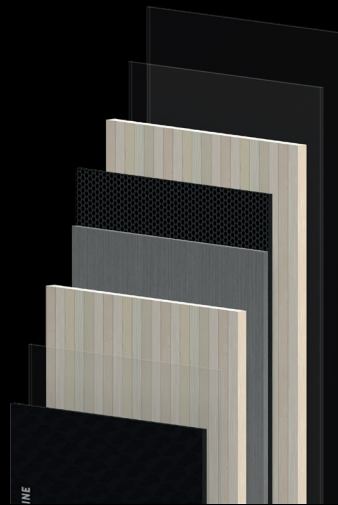

Yet when we began developing our Double Core technology, we didn't anticipate that it could transform skiing across the globe. Initially, the Nordica ski development team—led by Product Manager Florian Seer—aimed to reimagine how a women's ski could perform. This led Nordica's research and development team to divide the wood core—the soul of the ski—into two layers and embed an elastomer Pulse Core between them. This dampened vibrations to create a smooth yet powerful ride that boosted confidence.

PERFECT COMBINATION

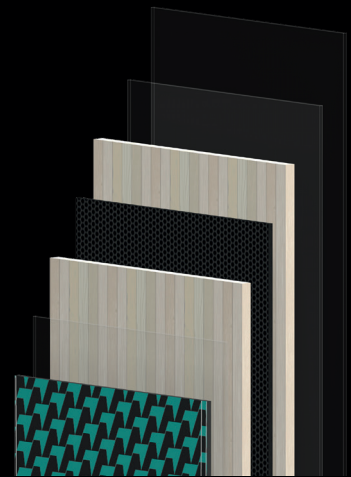

We've since expanded the use of our Double Core technology, reimagining iconic models by enhancing their performance even further. And while the design and construction of each model is tailored to its specific needs, these skis are united by a common vision—a commitment to amplifying fun.
