OUR PURPOSE
**FOR THE
MOUNTAINS**

PRODUCTS

We build for the mountains – all seasons, all terrains. Our purpose and know-how drives innovation, and our innovation drives market solutions and performance.

PLAYGROUNDS

Rossignol is from the mountains. It's where we live, where we work, where we play. The mountain gives us inspiration, and is why we rise.

PLANET

Our obligation is to preserve the integrity of the mountains and in turn, the ecosystem of our planet, for generations to come.

**AND
A MOUNTAIN
FOR ALL**

ACCESS

Rossignol equips the first mountain experience for many skiers. We want to inspire more first times on the mountain, across regions, cultures and disciplines.

DIVERSITY & INCLUSION

Across every aspect of identity, we want more people to have more turns and greater representation so they can find a sense of belonging on the mountain, especially communities left behind.

LESS IS MORE

The X-IUM PREMIUM+ was born from the idea that you can achieve more with less, in line with the increasingly widespread "LESS IS MORE" trend. Weight reduction was therefore the anchor point of the research. By removing the top layer of the ski (cap or topsheet), 80 grams per pair could be gained. Performance was increased thanks to a more efficient and yet, easier-to-handle ski. With the X-IUM Premium+, Rossignol has not only developed a safe product, but also one that is designed for maximum performance. In the 2022-2023 season, 100% of the medals at the Biathlon and Cross Country World Championships were won by ROSSIGNOL athletes on X-IUM PREMIUM+ skis.

This year, Rossignol has extended these innovations to its World Cup range. By producing a softer, more tolerant, and lighter ski, Rossignol wants to guarantee optimal skiing pleasure

for all skiers, not just those who focus on competition. Even if performance remains the main axis of the product, its skiability is its main advantage. This "LESS IS MORE" approach is in line with Rossignol's desire to consider the protection of the mountains, in particular through its own environmental Respect program. The redesign of the X-ium Premium+ and World Cup ski ranges is part of this plan, which aims to reduce industrial waste emissions by 40% by 2025 and reduce the carbon footprint by 30% by 2030. By removing the cap (or topsheet) along the entire length of the ski, Rossignol reduces plastic consumption and promotes the use of more environmentally friendly technologies.

Between innovation and modernity, Rossignol breaks with the habits of the market and listens to the skiers themselves.

RACE RESULTS 2022-2023

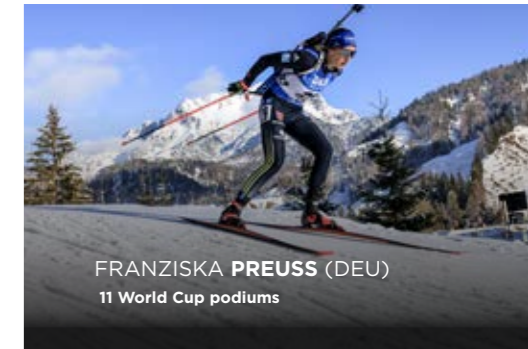

BIATHLON

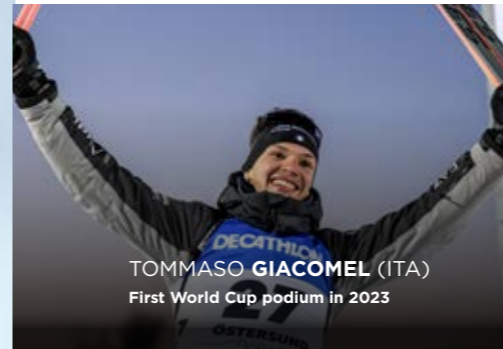

DOROTHEA WIERER (ITA)
2nd of the overall WC ranking in 2023 and 2 big globes in career

CHLOÉ CHEVALIER (FRA)
First World Cup podium in 2023

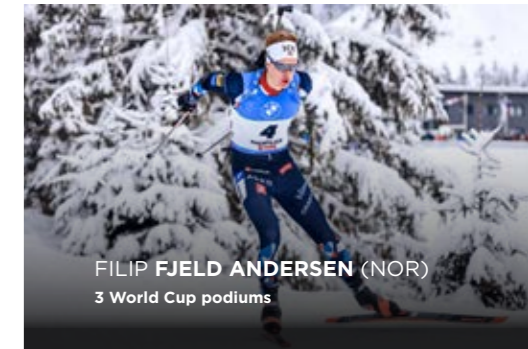

FRANZISKA PREUSS (DEU)
11 World Cup podiums

TOMMASO GIACOMEL (ITA)
First World Cup podium in 2023

EMILIEN JACQUELIN (FRA)
4 times World Champion

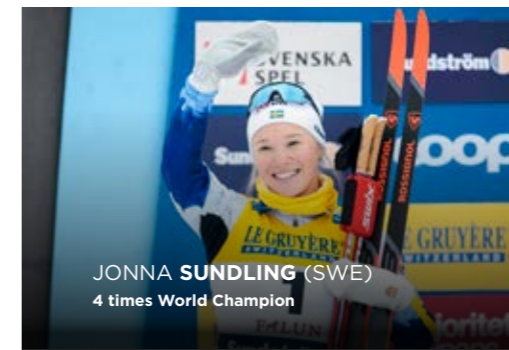

FILIP FJELD ANDERSEN (NOR)
3 World Cup podiums

CROSS-COUNTRY SKIING

EMMA RIBOM (SWE)
3 World Championships medals in 2023

JONNA SUNDLING (SWE)
4 times World Champion

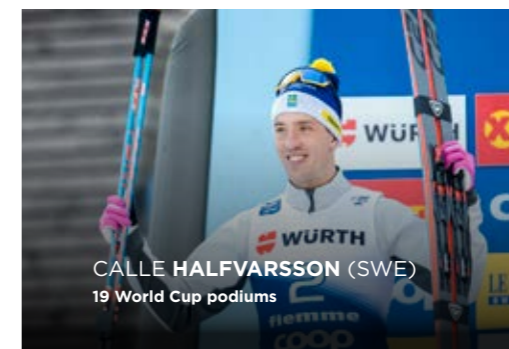

PAAL GOLBERG (NOR)
4 times World Champion

NORDIC COMBINED

FEDERICO PELLEGRINO (ITA)
6 World Championships medals

CALLE HALFVARSSON (SWE)
19 World Cup podiums

NATHALIE ARMBRUSTER (DEU)
2 silver medals at the World Championships 2023

SEGMENTATION

RACE EXPERT

ELITE-LEVEL TO COMPETITIVE ATHLETES

- Carbon enhanced constructions
- Rossignol Fit system
- Race ready constructions
- Top-end racing precision and performance

RACE PERFORMANCE

COMPETITIVE TO FITNESS ORIENTED SKIERS

- Top-end racing precision and performance
- Women specific fits

SPORT TOURING

ACTIVE

- Fitness-oriented to recreational skiers
- Complete R-Skin collection
- Traditional on-trail touring

SPORT

- Recreational skiers to active winter enthusiasts
- Lightweight, waxless, easy-to-use

BACKCOUNTRY

FITNESS-ORIENTED BACKCOUNTRY SKIERS

- Lightweight, waxless, full-metal-edges
- Off-trail exploring or light on-trail use

JUNIOR

A WIDE RANGE OF PRODUCTS FOR ALL LEVELS OF YOUNG SKIERS

Whether on the trails, in the forests or at the races.

TECHNOLOGIES SKI

EXTERNAL CONSTRUCTION

CONTROL EDGE

EDGE ENERGY SENSOR
A stiffer waist to increase acceleration.

CENTRAL-EDGE
Helps to focus the skier's energy beneath the waist and optimises efficiency and energy transmission.

3D PROFILE

3D CARBON PROFILE
A more consistent ski structure for superior control.

EDGE SUPRA

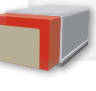

SUPRA EDGE
Reinforced edges for greater stability.

LOWER TIP

LOWER TIP
Softer and lighter tips and tails for a more balanced ski.

ACTIV'CAP

ACTIV'CAP
Combination of two materials (RossiCap + multidirectional fibreglass).

AIR TIP

AIR TIP
The AIR TIP base lightens the ski and improves acceleration whether using the double push or alternative technique.

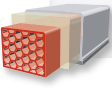

LESS+ TECHNOLOGY

LESS+
Lightweight structure concentrated only on the elements involved in the performance of the ski: removal of the Cap

INTERNAL CONSTRUCTION

HONEYCOMB

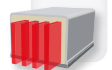

NOMEX
Construction of a honeycomb core for extreme lightness.

LDC CORE

LDC CORE
Lighter structure.

WOOD AIR

WOOD AIR
Wood construction with air channels.

SOLE

DOUBLE GROOVE

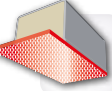

SKATING DOUBLE GUIDE GROOVE
Stabilizes the ski and facilitates tracking whatever its position.

R-SKIN

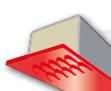

R-SKIN WAXLESS PATTERN
The synthetic waxless pattern behaves almost identically to a waxed ski, boasting easy grip on all types of snow and excellent glide performance whatever the conditions.

NUMERIC FINISH

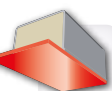

NUMERIC FINISH
This base preparation technology offers a limitless range of ready-to-ski finishes that will improve glide. World Cup base finishes for everyone!

POSITRACK

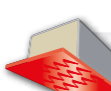

AR POSITRACK WAXLESS PATTERN
Thermoformed waxless pattern delivering very pleasant glide and excellent grip.

STONE FINISH

STONE FINISH
Milled base finish.

AR PLUS

AR PLUS WAXLESS PATTERN
Cut into the base itself, this AR waxless pattern is the perfect compromise between retention and gliding. Perfect for rental use.

TECHNOLOGIES BINDING

TURNAMIC®

Turnamic bindings have become essential on the market as the benefits to consumers and distributors are numerous and well known: ease and speed of assembly, customization to the needs of skiers, adaptation to the requirements of the slope profile, stability, control, behavior.

TURN LOCK

The ergonomic design of the lever with secure-grip soft components enables intuitive handling when stepping in and out of the binding. Haptic and acoustic response when opening and closing. Protected against unwanted opening.

STEP IN

The step-in latches the boot in the binding without having to touch the lever. The closing click ensures that the binding is properly closed.

HEEL PRE-ADJUST

Adjustable heel section where the boot size is preselected using snap hooks on the heel rails. The heel is automatically positioned with it when the position is adjusted so no separate adjustments are necessary later.

LOW PROFILE

The minimalistic design height ensures a low stand position and maximum stability as a result. This means a more stable gliding phase and a direct feel on the snow at the same time.

FLEXOR SKATING

With flex grade 11.0 and progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 40° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

TORSION PROOF BODY

The geometric design of the binding body delivers excellent torsional rigidity for direct and effective power transfer.

FLEXOR CLASSIC

With flex grade 5.0 and slightly progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 45° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

DOUBLE LOCK SLIDER/ CLIP LOCK

Double locking clip for easy and safe fixation and adjustment of the binding on the IFP (Integrated Fixation Plate). The step-in mechanism makes it extremely easy to step into the binding. You can hear the "click" when the binding is closed properly.

SAFE LOCK

It provides an extra level of safety for racers who start in a line and need to be sure there is no risk of unexpected pre-releasing, even in the event of crushing at a mass start or a long-distance start.

FLOWFLEX

The two part-plate and click-in setting with two closely arranged pins not only guarantees double the safety but also that the binding is fixed on one point. The rest of the binding housing has a floating bearing design along the entire length which has no negative effect on ski performance.

TECHNOLOGIES BOOTS

This year Rossignol completes its range of TURMANIC® soles with two new carbon COURSE soles. Thanks to the CARBON THERMODURE technology, the sole-back stiffener becomes one unit, for precision and maximum energy transmission. This sole-back stiffener unit creates an extremely highperformance carbon chassis when it comes to steering the ski.

SOLES

A RANGE OF SEVEN DIFFERENT SOLES SEGMENTS OUR BOOT RANGE TO MEET TO THE VARYING EXPECTATIONS OF USERS.

 <p>CARBON PREMIUM SKATING Technology: CARBON THERMODUR Rigidity and flex skating.</p>	 <p>CARBON PREMIUM CLASSIC Technology: CARBON THERMODUR Rigidity and flex classic.</p>	 <p>CARBON EXPERT SKATING Technology: CARBON Rigidity and flex skating.</p>	 <p>EXPERT SKATING The rigid central "Carbon Aspect" insert provides strengthened torsional rigidity.</p>
 <p>EXPERT CLASSIC The flexible central insert allows for a natural foot roll during propulsion.</p>	 <p>SPORT The bi-injection insert provides optimum feel for sports skiers.</p>	 <p>TOURING The flexible central insert gives the boots optimum comfort as well as torsional rigidity for added stability.</p>	

THE CHASSIS

3 POSITIONS SENSOR

The sole is built around three fundamental support points: the front of the first and fifth metatarsal bones and the heel to maximise the performance and comfort of the boot.

AXIS PROTECTOR

Our competitors mould the binding axis directly into the sole. Rossignol has adopted a different approach by integrating the axis into an independent and extremely hard-wearing plastic part, which is then incorporated into the chassis to avoid stiffening the front of the boot while retaining all the flexibility and roll of the foot during classic cross-country skiing. This technology is available in all the ranges and gives classic boots a similar feel to running shoes with greater sensations when propelling.

LOW PROFILE

The sole boasts a slim-line design, so that the skier's foot is as close to the snow as possible, thereby delivering lightness, feeling and superior control.

GRIP TECH

Crampons with a unique design and composition for comfortable and safe walking.

THE CENTRAL INSERT

Rossignol has designed various inserts to give each sole a specific set of attributes tailored to each technique (skating/classic) and the level of use (race/sport/touring). By manipulating their materials and their density and altering the shape of the central insert, each sole excels in behaving exactly how skiers need them.

FOR CLASSIC MODELS

A soft plastic central insert allows for natural foot roll during propulsion and a double guide groove across the entire length of the sole offers better control for groomed trails.

FOR TOURING MODELS

An extremely soft and flexible central insert produces a comfortable boot with excellent torsional rigidity for even greater stability.

FOR SKATING MODELS

A "Carbon Aspect" central insert increases the sole's torsional rigidity. Its specific Skating shape improves efficiency during propulsion and increases stability when striding.

FOR SPORT PERFORMANCE MODELS

A bi-technical insert brings the best compromise to boots designed for our sports customers.

THE MID SOLE

The mid sole acts as an interface between the external sole and the boot. It determines the required flexibility and rigidity. Their importance is such that Rossignol is focusing its development efforts on the comfort and ergonomics that mid soles can procure.

BOOTS CONSTRUCTION

CARBON THERMODUR CHASSIS

Sole unit made from a single piece of 100% carbon THERMODUR

- Maximised torsional rigidity
- Optimised front flexion
- Energy transmission

SOFT TOUCH

Ultra-comfortable control thanks to the interface membrane.

- Comfort
- Control
- Fit.

DUAL CORE

Injection-molding using different densities of material in the same mold.

- Precision of movement
- Prevents energy wastage
- Optimal contact.

ASYMMETRIC BACK STIFFENER

Stiffener to suit every situation.

- Arch support
- Torsional rigidity
- Well-supported, stable platform.

CARBON CUFF

• 100% carbon cuff

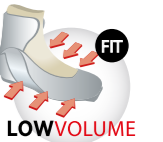

- Optimal power transfer.

LOW VOLUME FIT (LVF)

A unisex alternative for more slender feet (Low Volume Fit). Personal attention!

- Easy foot entry and close fit
- 100% feel
- Total envelopment of the foot.

THERMO ADJUSTABLE FIT

Thermoformable materials are heated so that boot volume can be changed. The boot adapts itself to the foot. Tailor-made!

- Comfort
- Precision
- Feel.

TECH CONTROL WRAP

A light and effective concept that opens up real sensations in Classic together with stability and easier ski control.

MOBILE CUFF

Optimal freedom of fore/aft movement combined with torsional rigidity for total control.

THE SPIRAL ZIPPER CONCEPT

The zip spirals around the calf to allow more freedom of movement around the ankle for the skier, with greater freedom for the foot at the front and back of the boot. The Spiral Zipper concept, which wraps around the calf, and higher stem enhance comfort, foot support and freedom of movement and maximise sensations on snow. The revised stem construction also improves proprioception for greater precision and optimum control of the ski.

ADJUSTMENT

DOUBLE LACING SYSTEM

A single system provides independent control of mid and forefoot closure for more comfort and precision.

SPEEDLACE LOCK

Rapid, easy closure for better support of the foot and more precision.

ADJUSTABLE STRAP

For more support and control.

TECHNOLOGIES POLES

R-clip

R-clip technology allows you to click in and out of your pole grips with the same ease as bindings, providing perfect hand positioning and a far more sturdy connection to the pole. Compatible with carbon shafts, the alpine grip is made from a single plastic so the grip can be recycled, the Nordic grip is made from cork with a redesigned strap that's more ergonomic than ever.

PA CLIP

PA INSERT

PC GRIP

Using mono-material grip so it can be recycled
