uvex

protecting people since 1926

Professional or recreational. Competition or fun. As one of the leading international manufacturers of protective products with headquarters in Fuerth, we at uvex inspire our customers every day with groundbreaking technologies and innovative products. 24/7 – since 1926. To achieve the best, whether in leisure, sports or work. To protect people.

**“When you crash into
an A-grid at 120 km/h,
it’s good to be able to
rely on your equipment.”**

Thomas Dreßen, GER, Skiracer

Made in Germany. Innovative protection since 1926.

MADE IN
GERMANY

As a partner for international top-level sport, uvex equips many professional athletes worldwide. uvex sports operates throughout the world and plays a decisive role in shaping the uvex brand.

The uvex sports group strives to manufacture its products in Germany where possible. Every uvex helmet is made in uvex.

**MADE IN
GERMANY**

Responsibility

for us means ensuring fair working conditions and remuneration, including for suppliers and partners. And being independent of global supply chain issues means we can deliver to retailers and consumers quickly and reliably.

Quality

for us means placing the highest demands on our products. Developing and testing them in-house and maintaining complete control over the entire supply chain at all times.

Sustainability

for us means complete control over the materials we use, the reduction of CO₂ emissions due to short delivery routes, and the development of products with excellent, sustainable properties aligned with our "protecting planet" philosophy.

Competence

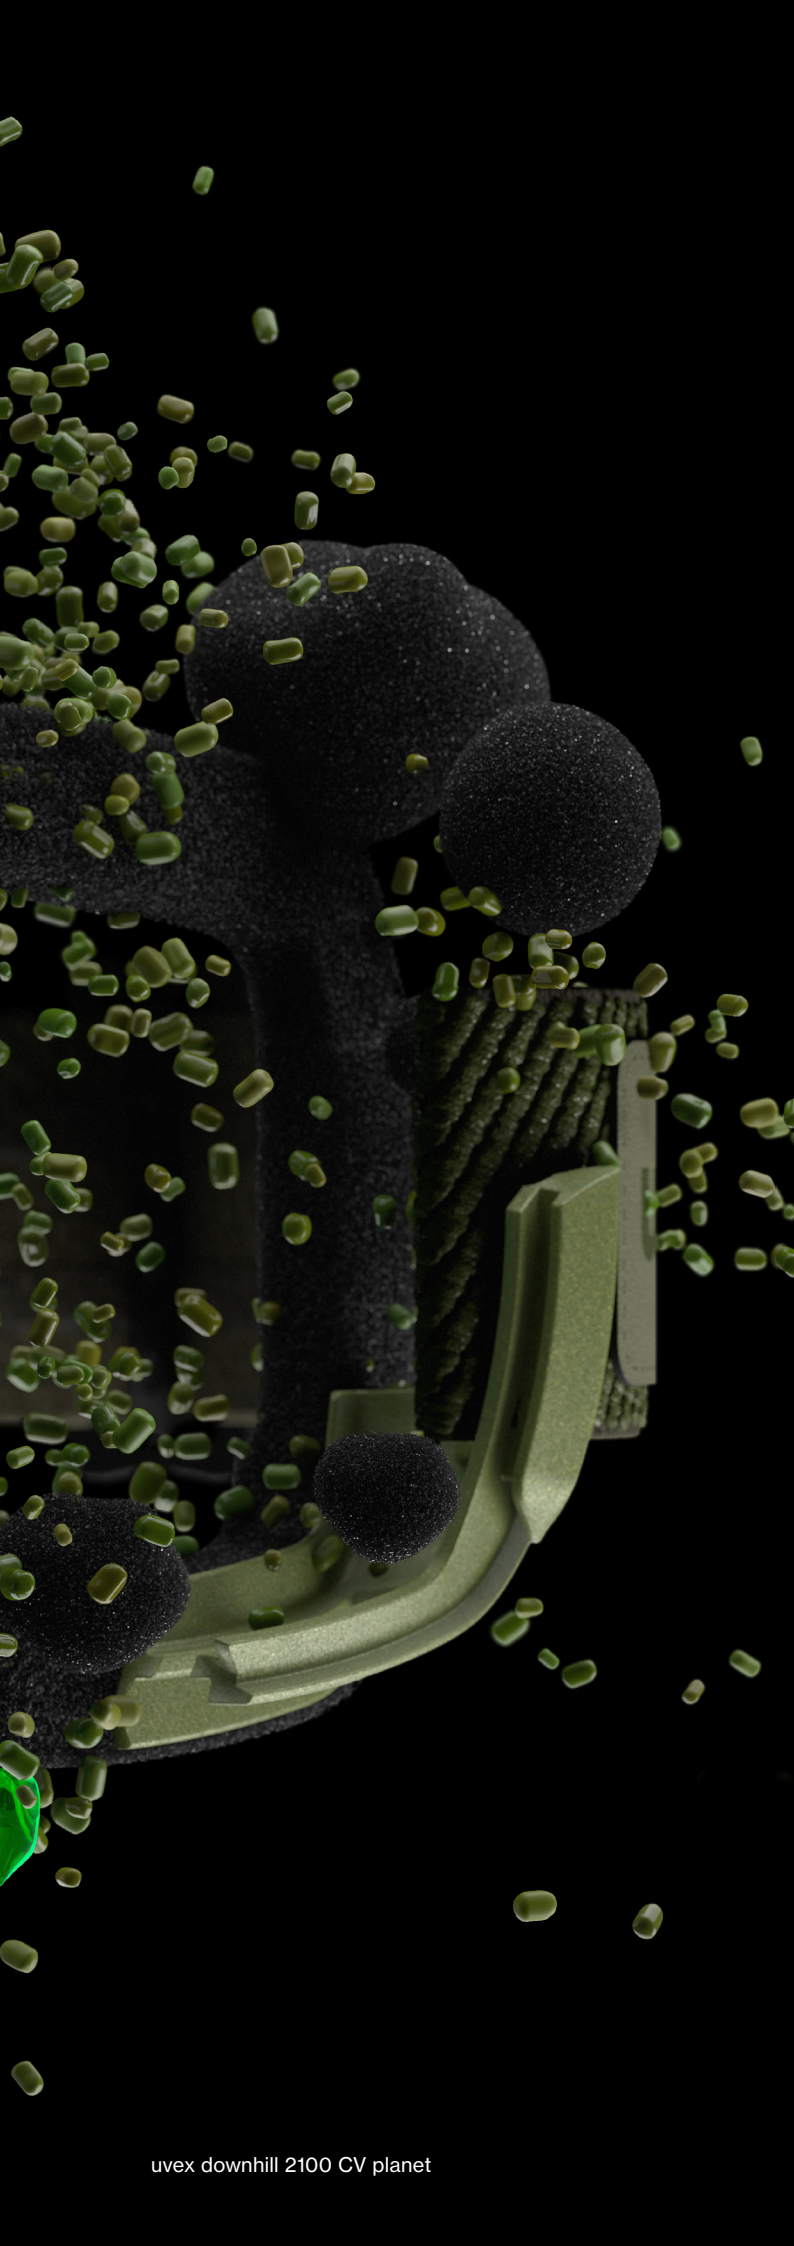

is demonstrated daily in our competence centers in Fuerth, Lederdorn and Oberzell. This guarantees that we can react quickly to market and supply developments.

protecting people.
protecting planet.

reddot winner 2022

For almost 100 years, we've been developing, making and selling products that protect people in their sport, leisure and work activities. And anyone who protects people needs to protect their environment too. That's why we're very vigilant with the entire value chain - from the product idea and development through to production and sales.

In our own state-of-the-art factories as well as at our partner companies, we ensure that we always act in an ecologically and economically astute manner. The result: intelligent products produced in a responsible way, featuring the highest levels of protection and uncompromising excellence in design and function.

All of our sports eyewear and goggles provide 100 % UVA, UVB and UVC protection up to 400 nm. We equip them with the highest quality lens technologies, such as supravision®, colorvision®, and polavision®.

At least 70 % of the uvex Eyewear Collection frames are partly made (about 45 %) of bio-based plastics.

We go even further with some sports eyewear models. The uvex esntl pina and uvex esntl epic have a frame made of 100 % recycled nylon.

The proportion of sustainable uvex products increases every year. Because we love the planet.

protecting planet

by using recycled material //

Progressive design, proactive protection and professional performance. Meet the uvex invictus.

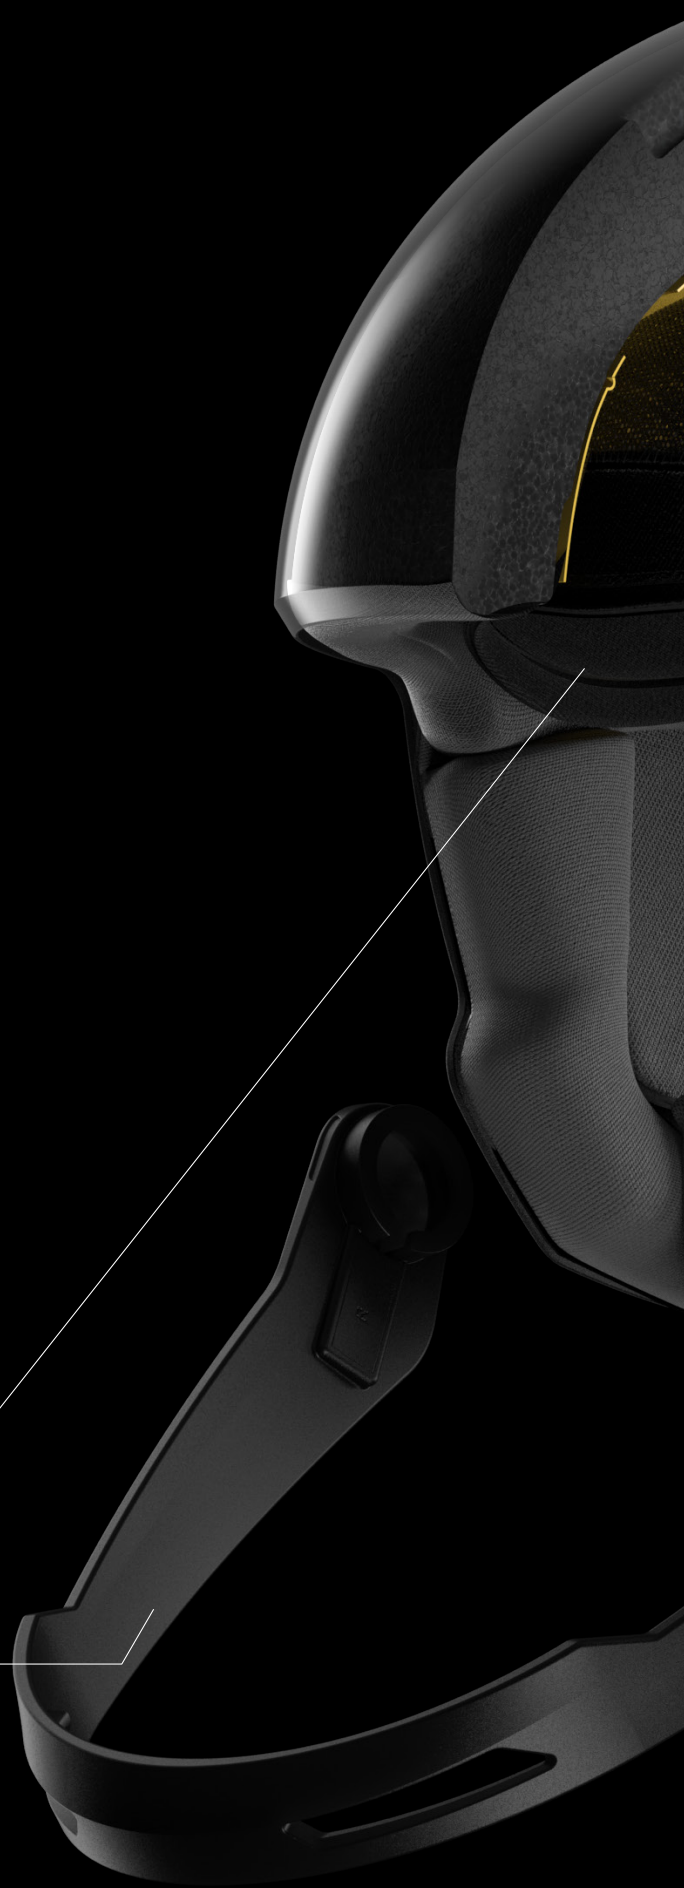

Whether you're a pro or simply a speed addict – the uvex invictus gives you safety and race performance on the highest level. With its innovative features and uvex +technology, this aerodynamic, high-end helmet sets new safety standards on the piste. The integrated MIPS directs the energy away from the head in the event of a fall away from the head in the event of a fall and a special shell impact resistance with a 15% weight saving. Optimised ventilation enable perfect climate management at all temperatures. An optional, height-adjustable Safety Chin Guard with breakaway function makes the uvex invictus a real all-rounder – for downhill and slalom.

Page 15

High-end Functional features:
Top-quality removable comfort liner

Safety Chin Guard:
Height-adjustable chin guard with
emergency breakaway function

Outer shell with +technology:
innovative, lightweight and very
shock-resistant special polymer

Perfect temperature regulation:
optimized ventilation

MIPS:
security system reduces
dangerous rotational movements

Quick release function:
bayonet lock to fit the chin
guard quickly and without tools

made 2 perform. Backcountry action. Safety for your head. Pure freeride. The uvex levitate MIPS.

Fast speed. Full focus. For an all-mountain freeride helmet to perform, it needs to do more than simply look cool. The uvex levitate MIPS excels at safety and creating a comfortable fit. This hybrid helmet construction combines an impact-resistant ABS hardshell with a shock-absorbing polycarbonate inmold layer and cushioning EPS inner shell. The built-in MIPS system absorbs rotational forces during a fall, while the fit is precisely tailored to your head in just seconds, thanks to the uvex IAS Fit System. The COOLMAX® Eco Made all season liner also adds to the comfort and snug fit of the helmet. An active ventilation system on the top and back of the head generates fresh airflow throughout the helmet to dump heat and regulate inner climate. The magnetic Fidlock® buckle on the chin strap is easy to operate with one hand and while wearing gloves. But a real highlight of this helmet is the adjustable shield. This creates a seamless seal between helmet and goggles. And because being aware of sounds in your surroundings is especially important for action sports, the ear pads are equipped with Hear Through technology. Topping off the high-performance spec of the uvex levitate MIPS.

Page 19

Seamless integration: adjustable shield
for a perfect fit with uvex goggles

Temperature regulation: adjustable active
ventilation system throughout and two-part
removable COOLMAX Eco Made all season
liner

Proven safety: TÜV Rheinland
according to EN 1077:2007 B

Reliable protection: hybrid
construction of impact-resistant
ABS hardshell with shock-absorb-
ing polycarbonate in-mold layer,
EPS inner shell and integrated
MIPS

Clear acoustics: ear pads with
Hear Through technology for
better ambient sound perception

Precise custom fit: uvex IAS Fit
System

Good sound: audio ready ear
pads

Easy handling: magnetic Fidlock®
buckle

**Perfect ski goggles.
That's always been
the uvex DNA.**

Lens tech. Everything in view – whatever the conditions.

The uvex brand's DNA is embedded in our ski goggles – especially our leading lens technologies. All made possible by our inhouse engineering and our own production facilities. uvex CV (uvex colorvision® und uvex contrastview) delivers ultimate contrast and maximum colour perception – even when visibility is very poor. The self-tinting uvex vario-matic® lenses adapt from light to dark in a few seconds – as soon as the light conditions change. Ski goggles with uvex polavision® give you reliable protection from glare and reflections that can affect your visibility on the mountain. The uvex supravision® coating technology, available for all uvex ski goggles, ensures you have fog-free and accurate vision.

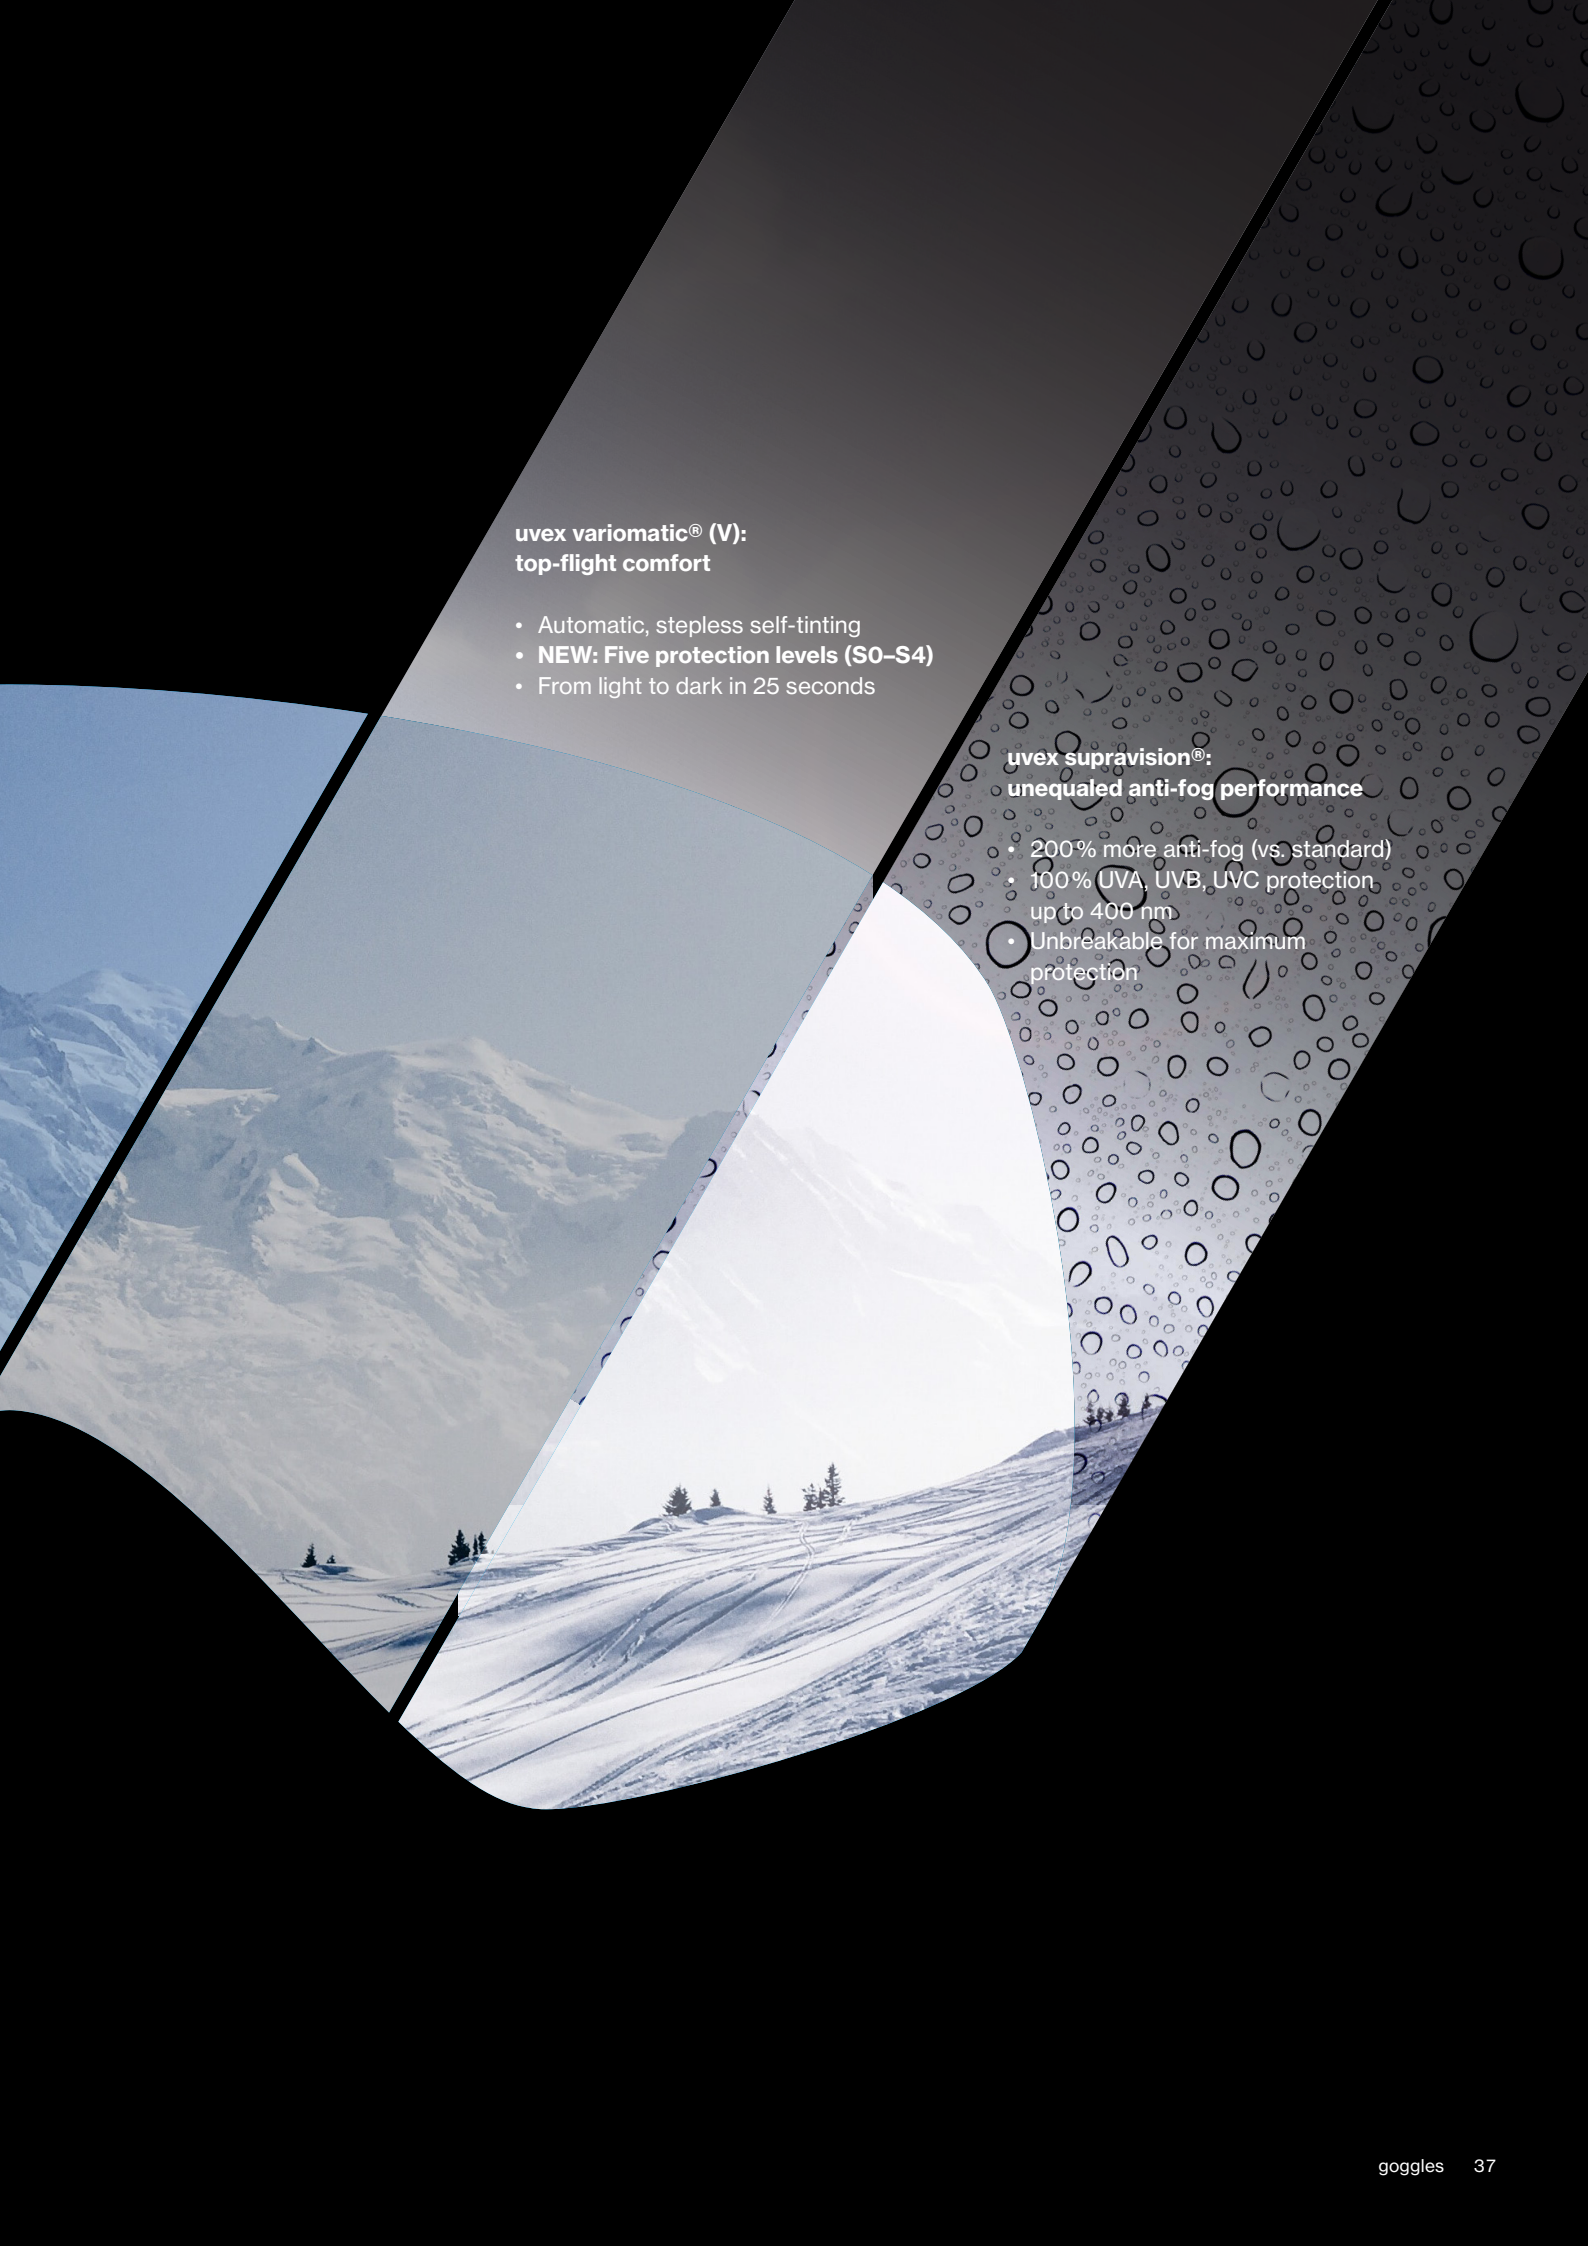

#made2perform

uvex CV (uvex colorvision® / uvex contrastview): wow effect included

- Ultimate contrast enhancement
- Maximum colour perception
- 100% UVA, UVB, UVC protection up to 400nm

uvex polavision® (P): less glare, more joy

- Fewer distracting reflections
- Minimized glare reduces eye strain
- Better detail vision, even in difficult light conditions

uvex variomatic® (V):
top-flight comfort

- Automatic, stepless self-tinting
- **NEW: Five protection levels (S0-S4)**
- From light to dark in 25 seconds

uvex supravision®:
unequaled anti-fog performance

- 200% more anti-fog (vs. standard)
- 100% UVA, UVB, UVC protection, up to 400 nm
- Unbreakable for maximum protection

uvex CV* sharpen your vision.

Meet uvex CV. A synonym for the highest level of contrast between bright colours – regardless of locations and conditions. On the piste, in deep snow, on demanding tours. Plus: stronger depth perception if visibility gets low. Ensures better performance and maximum safety. Always. Everywhere.

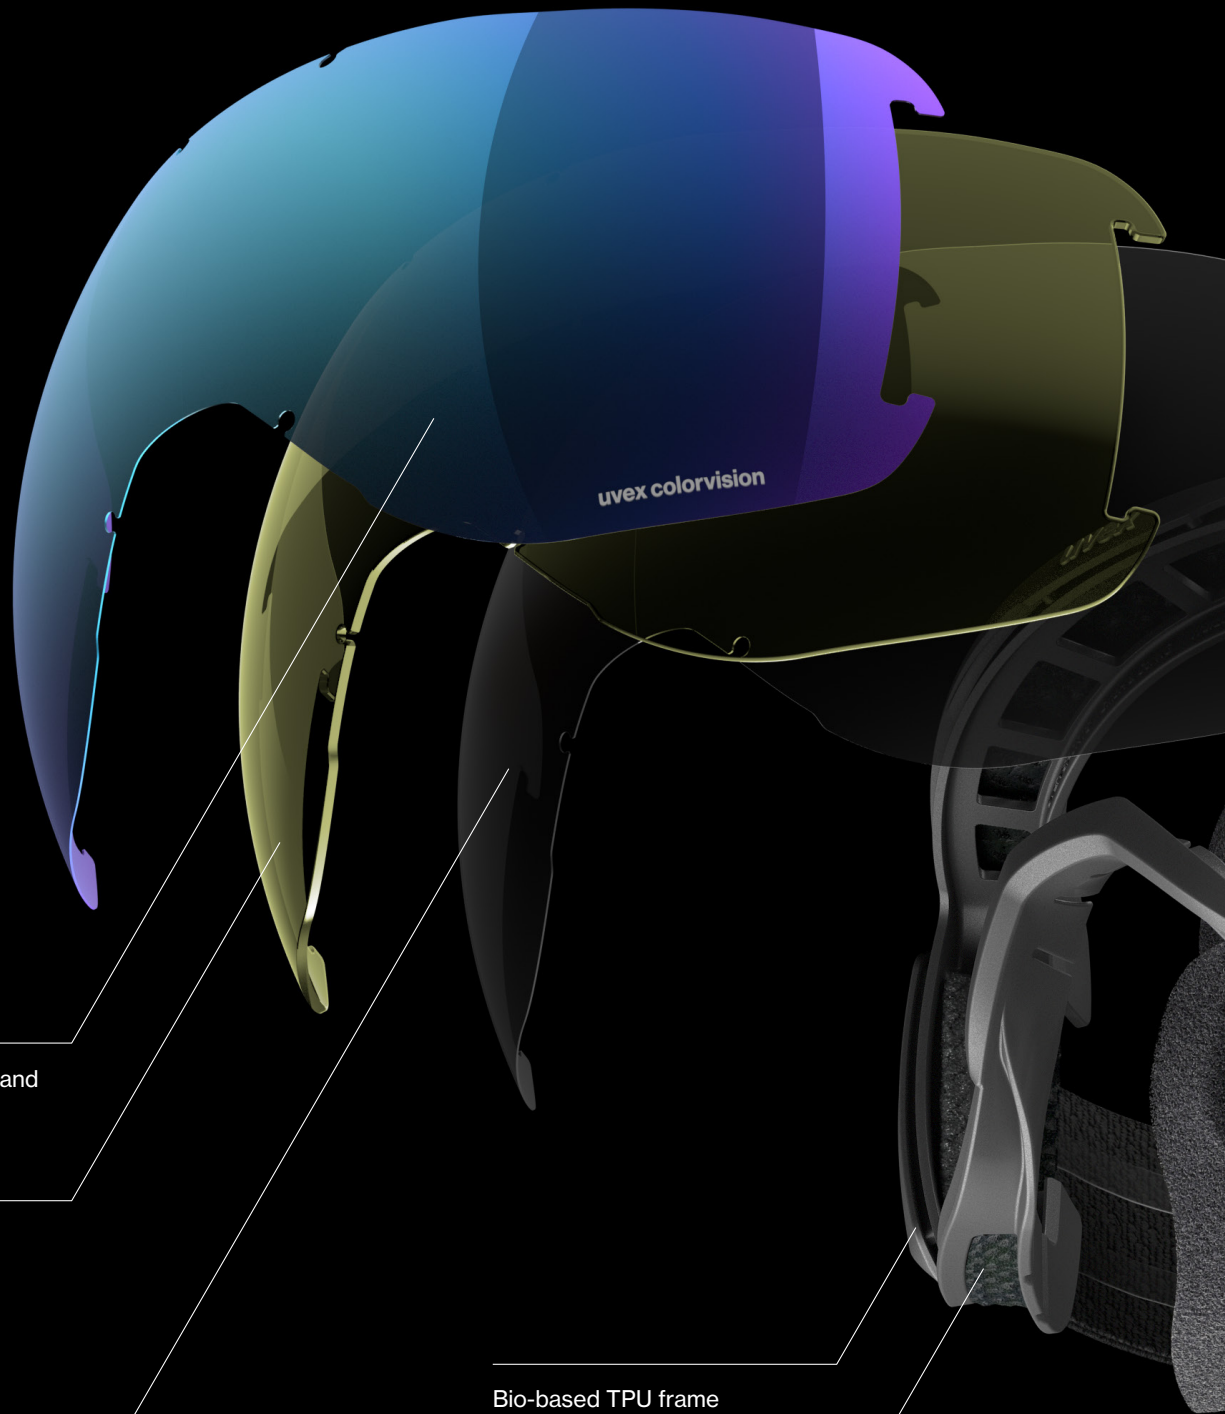

- Ultimate contrast enhancement
- Maximum colour perception
- 100% UVA, UVB, UVC protection up to 400 nm

Bio-based TPU frame with water-based varnish

Temperature-regulating membrane in recycled yarn

Meet the revolutionary, sustainable reissue of one of the world's best-selling ski goggles – and the launch of our planet series. We're extending our "protecting people" mission with the "protecting planet" pledge.

As a brand that works every day with innovative safety and vision technologies, we'll never close our eyes to the challenges of the

future. That's what gave us the idea of producing our outstanding and highly functional ski goggles – the uvex downhill 2100 CV – using sustainability principles but without compromising on design, function and protection. And we're proud of the result.

uvex Skibrillen. High-end technology. And outstanding design.

uvex ski goggles. A success story right from the first day. Always highly functional with groundbreaking innovations – from anti-fog coatings and contrast enhancement to reduced light reflections, automatic tinting, a larger field of vision and optimized peripheral vision.

The result? 100 percent performance, function, comfort and design. In all weather and visibility conditions. For ambitious amateur sports enthusiasts as well as elite athletes.

And our success story doesn't stop there. We've developed cylindrical, spherical and toric lenses with take-off technologies – plus our unique ATTRACT-TEC magnetic interchangeable lenses. All made in uvex, with passion and top-flight expertise. All part of our DNA.

tech summary helmets

Tested for safety

Ski helmet standard
EN 1077:2007

Mountaineering helmet standard
EN 12492:2012

Bicycle helmet standards
EN 1078:2012 + A1:2012

Also GS tested

The voluntary certification mark "GS" stands for "Geprüfte Sicherheit" ("tested safety"). More details on the test criteria are available at: www.uvex-sports.com/ce

Shell technologies

hardshell

A highly effective combination of an injection-molded outer shell and an EPS inner shell, making it:

- Robust
- Highly impact-resistant
- Shock-absorbent
- Insulated against cold

inmould

The EPS is injected directly into the polycarbonate shell to make it:

- Light
- Impact-resistant

hybrid-technology

The robust hardshell on the upper part of the helmet is bonded to the lower part using the Inmould process for:

- Perfect ventilation
- Impact resistance
- Optimal fusion of the hardshell and inmould technology

+technology

Innovative and very light special polymer.

Shell material

Polycarbonate

inmould

Protective as the PC layer is firmly bonded to the EPS layer

CFK

hardshell

Polymer reinforced with carbon fiber used in high-end and lightweight helmets

ABS

hardshell

Ultra-effective protection and maximum robustness

EPS

hardshell//inmould//hybrid

Protective material comprising microscopically small air cells that absorb the force of an impact

Protective systems

MIPS

The Multi-Directional Impact Protection System (MIPS) protects the brain against rotational movements that can be very dangerous in case of an impact to the head.

Fit adjustment systems

Comfort features	IAS Optimal width adjustment with an ergonomic dial system	3D IAS Optimal width and height adjustment with an ergonomic dial system

tech summary goggles

Lens technology

uvex colorvision® (CV)

These tinted uvex colorvision® lenses with a +15% bigger field of vision deliver maximum contrast enhancement for single lenses and +400% anti-fog effect compared to the standard.

uvex colorvision® green

Green is the variant for good weather and the perfect choice when it's sunny or slightly cloudy.

uvex colorvision® orange

Orange is a universal all-rounder and suitable for any weather.

uvex colorvision® yellow

Yellow works hard when it's cloudy or snowing, providing the best possible vision in difficult visibility conditions.

uvex supravision®

This uvex core technology proved in tests that it offers 200% more anti-fog compared to the standard and stays fog-free up to 60 seconds: precise vision and maximum protection. Includes 100% UVA, UVB and UVC protection up to 400 nm.

uvex variomatic® (V)

The automatic and stepless self-tinting, from light to dark in 25 seconds, combines five protection levels (S0-S4) and uvex supravision® anti-fog coating in one product. Plus: the lenses offer 100% UVA, UVB and UVC protection.

uvex polavision® (P)

uvex polavision® absorbs scattered light and gives reliable protection against reflections and glare. Prevents eye strain, even in demanding conditions. Plus: the lenses offer 100% UVA, UVB and UVC protection.

uvex contrastview (CV)

Tinted lenses with an integrated colour filter for double lenses enable sharp contrasts and better vision. With uvex supravision® anti-fog coating. Plus: the lenses offer 100% UVA, UVB and UVC protection.

Ski goggle protection

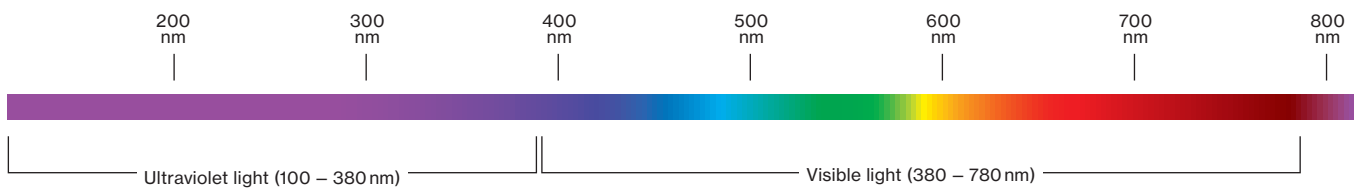

Crack-resistant

NORM: EN 174:2001

Tested with the demanding impact test. Further information in the uvex Techbook.

Scratch-resistant

Ultra-robust polycarbonate lenses resist sub-zero temperatures without compromising their strength. A special coating protects them from scratches. Further information in the uvex Techbook.

100% UV protection up to 400 nm

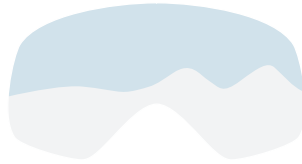

Our UV absorber offers 100% protection against damaging UV rays up to 400 nm.

Lens technology

uvex colorvision®

The four innovative uvex colorvision® tints provide ultimate contrast and perfect vision – with a matching lens for every situation.

- Ultimate contrast enhancement
- Maximum color perception
- 100% UVA, UVB, UVC protection up to 400 nm

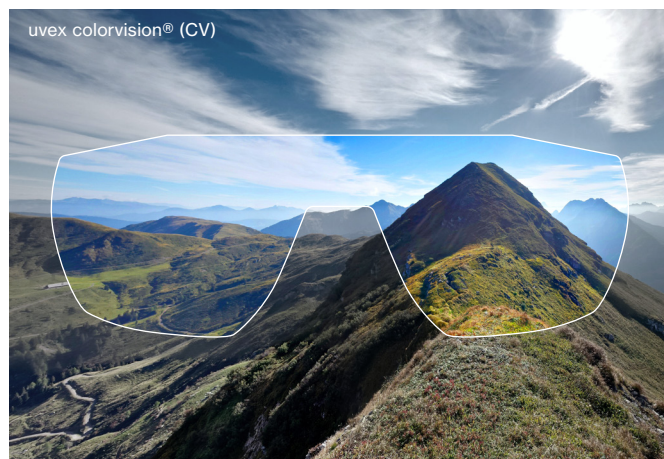

brown

amber

green

uvex variomatic®

Eyewear with uvex variomatic® automatically reacts to the natural light conditions.

- Automatic, stepless self-tinting
- From light to dark in 25 seconds
- Three levels of protection in one lens (cat. 1–3 and cat. 2–4)
- 100% UVA, UVB, UVC protection up to 400 nm

uvex supravision®

The uvex supravision® coating ensures fog-free vision without affecting the optical quality of the lens. It remains fog-free for twice as long as specified by the standard.

- 200% more anti-fog (vs. standard)
- Break-resistant for maximum protection
- 100% UVA, UVB, UVC protection up to 400 nm

uvex polavision®

Reliable protection against reflections and glare: the lenses of the uvex polavision® series absorb diffused light and reliably protect the eyes from overexertion.

- Polarizing lenses against annoying reflections
- Reduce stray light and glare
- For a comfortable viewing experience

uvex colorvision® variomatic®

uvex variomatic® meets uvex colorvision® technology: lens tinting and contrast enhancement – in a single, innovative uvex lens. Made for sports activities in any weather and any environment.

Decentered lens technology

Distortions and curvatures in the field of view can quickly lead to irritation. uvex therefore uses grade 1 decentered lenses, which allow a distortion-free view.

Direct lens ventilation

The uvex temperature competence ensures permanent, draft-free ventilation. This keeps the field of view fog-free twice as long as conventional standards demand.

Easy to clean

The special coating on the lens allows moisture or fingerprints to be easily removed.

VPX

uvex sunglasses with variomatic polavision extended technology (VPX) – featuring automatic, stepless self-tinting in all light conditions, as well as secure protection against glare and annoying reflections.

Interchangeable lenses

Interchangeable lenses guarantee uncomplicated handling and perfect visibility in all weather conditions.

Robust and scratch-proof

Made of extremely durable polycarbonate, the lenses withstand temperatures down to –40 °C without compromising mechanical strength. A special coating to protect against damage according to standard EN ISO 12312-1 makes the lenses scratch-resistant without impairing the view.

Soft nose pads and earpiece ends

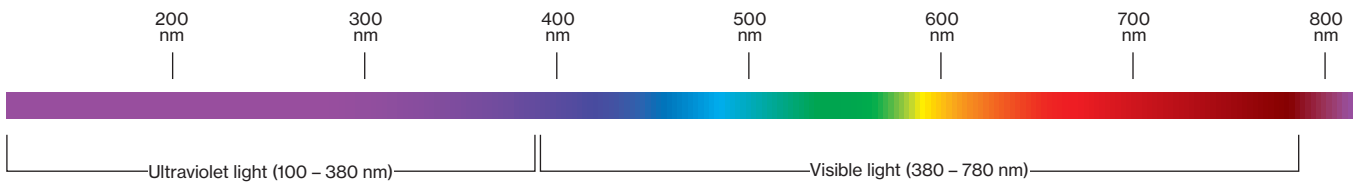

A pair of glasses fits perfectly when you cannot feel them. Soft nose pads and soft earpiece ends ensure pressure-free wearing comfort. The soft earpieces are cold-formable on a variety of models. They ensure a perfectly secure fit.

UV protection

Ultraviolet absorbers integrated directly into the raw material filter 100% of harmful UVA, UVB, and UVC radiation up to 400 nm.

European standard for sports eyewear and goggles

EN ISO 18527-1:2022 / EN ISO 18527-1

100 % UV protection up to 400 nm

Our UV absorber offers 100% protection against damaging UV rays up to 400 nm.
